CONTENTS OF VOLUME 220

No. 1. *January* 1972

PAGE

Fatigue of maintained voluntary muscle contraction in man. By J. A. Stephens and A. Taylor 1

Re-investigation of the effect of adrenaline and noradrenaline on renal function *in situ*. By C. C. Liang and Mabel M. P. Yang . 19

Peristalsis in the rabbit distal colon. By B. R. Mackenna and H. C. McKirdy 33

Intracellular sodium activity and the sodium pump in snail neurones. By R. C. Thomas 55

The action of phospholipases on the inner and outer surface of the squid giant axon membrane. By N. Joan Abbott, T. Deguchi, D. T. Frazier, K. Murayama, T. Narahashi, A. Ottolenghi and C. M. Wang 73

Recurrent inhibition of antidromically identified rat supraoptic neurones. By J. J. Dreifuss and J. S. Kelly 87

The activity of identified supraoptic neurones and their response to acetylcholine applied by iontophoresis. By J. J. Dreifuss and J. S. Kelly 105

Respiratory movements and rapid eye movement sleep in the foetal lamb. By G. S. Dawes, H. E. Fox, B. M. Leduc, G. C. Liggins and R. T. Richards 119

Decremental conduction of the visual signal in barnacle lateral eye. By Stephen R. Shaw 145

A reflex increase in heart rate from distension of the junction between the superior vena cava and the right atrium. By C. T. Kappagoda, R. J. Linden and H. M. Snow 177

Compensatory hypertrophy of the contralateral kidney after unilateral ureteral ligation. By S. E. Dicker and D. G. Shirley . 199

Adrenergic re-innervation of smooth muscle of nictitating membrane by preganglionic sympathetic fibres. By B. Ceccarelli, F. Clementi and P. Mantegazza 211

The effect of angiotensin, noradrenaline and vasopressin on blood flow distribution in the rat kidney. By J. P. M. Finberg and W. S. Peart 229

PAGE

Pharmacological properties, cholinesterase activity and anatomy of nerve–muscle junctions in vagus-innervated frog sartorius. By LYNN LANDMESSER 243

No. 2. *January* 1972

Thermoregulatory effects of intrahypothalamic injections of adrenergic and cholinergic substances at different environmental temperatures. By DAVID D. AVERY 257

Ionic differences between somatic and axonal action potentials in snail giant neurones. By FLORA WALD 267

The influence of deep body temperatures and skin temperatures on respiratory frequency in the pig. By D. L. INGRAM and K. F. LEGGE 283

Sympathetic inhibition of the urinary bladder and of pelvic ganglionic transmission in the cat. By WILLIAM C. DE GROAT and WILLIAM R. SAUM 297

The sensitivity of the hepatic glycogenolytic mechanism to stimulation of the splanchnic nerves. By A. V. EDWARDS 315

Effect of temperature on muscle energy metabolism and endurance during successive isometric contractions, sustained to fatigue, of the quadriceps muscle in man. By R. H. T. EDWARDS, R. C. HARRIS, E. HULTMAN, L. KAIJSER, D. KOH and L-O. NORDESJÖ 235

The temperature dependence of activation by phosphatidylserine of the sodium pump adenosine triphosphatase. By R. N. PRIESTLAND and R. WHITTAM 353

The antagonistic actions of calcium and magnesium on the superfused ventricle of the snail *Helix pomatia*. By R. F. BURTON and J. R. LOUDON 363

Image quality of the cat eye measured during retinal ganglion cell experiments. By A. B. BONDS, CHRISTINA ENROTH-CUGELL and L. H. PINTO 383

Properties of the surround response mechanism of cat retinal ganglion cells and centre–surround interaction. By CHRISTINA ENROTH-CUGELL and L. H. PINTO 403

Pure central responses from off-centre cells and pure surround responses from on-centre cells. By CHRISTINA ENROTH-CUGELL and L. H. PINTO 441

PAGE

The isoenzymes of carbonic anhydrase: kinetic properties with particular reference to the functions in the intestinal tract. By M. J. Carter and D. S. Parsons 465

A comparison of the behaviour to ions of the PIII component of the pigeon cone and rat rod electroretinogram. By G. B. Arden and W. Ernst 479

Radioimmunoassay of gastrin in human plasma. By P. C. Ganguli and W. M. Hunter 499

No. 3. *February* 1972

Review Lecture. Pigments and signals in colour vision. By W. A. H. Rushton 1*P*

Regional distribution of cardiac output in young lambs: effect of cold exposure and treatment with catecholamines. By G. Alexander, A. W. Bell and B. P. Setchell 511

Circadian rhythms in human salivary flow rate and composition. By C. Dawes 529

The surface area of sheep cardiac Purkinje fibres. By Bert A. Mobley and Ernest Page 547

Activation of the electrogenic sodium pump in guinea-pig auricles by internal sodium ions. By H. G. Glitsch 565

Energetics of activation in frog and toad muscle. By I. C. H. Smith 583

Activation heat, activation metabolism and tension-related heat in frog semitendinosus muscles. By E. Homsher, W. F. H. M. Mommaerts, N. V. Ricchiuti and A. Wallner 601

Measurements of small variations in 'absolute' pitch. By V. T. Wynn 627

Effect of chemical sympathectomy on the content of acetylcholine, choline and choline acetyltransferase activity in the cat spleen and iris. By S. Consolo, S. Garattini, H. Ladinsky and H. Thoenen 639

The polarizing action of acetylcholine or carbachol in intestinal smooth muscle. By T. B. Bolton 647

PAGE

Reflex respiratory and cardiovascular effects of stimulation of receptors in the nose of the dog. By JENNIFER E. ANGELL JAMES and M. DE BURGH DALY 67

The hyperglycaemic response to stimulation of the hepatic sympathetic innervation in adrenalectomized cats and dogs. By A. V. EDWARDS 69

Influence of the carotid rete on brain temperature in cats exposed to hot environments. By M. A. BAKER 71

The effect of vasopressin (Pitressin) administration and dehydration on the concentration of solutes in renal fluids of rats with and without hereditary hypothalamic diabetes insipidus. By J. LEE and P. G. WILLIAMS 72

The relations between sarcomere length and characteristics of isometric twitch contractions of frog sartorius muscle. By R. I. CLOSE 74
